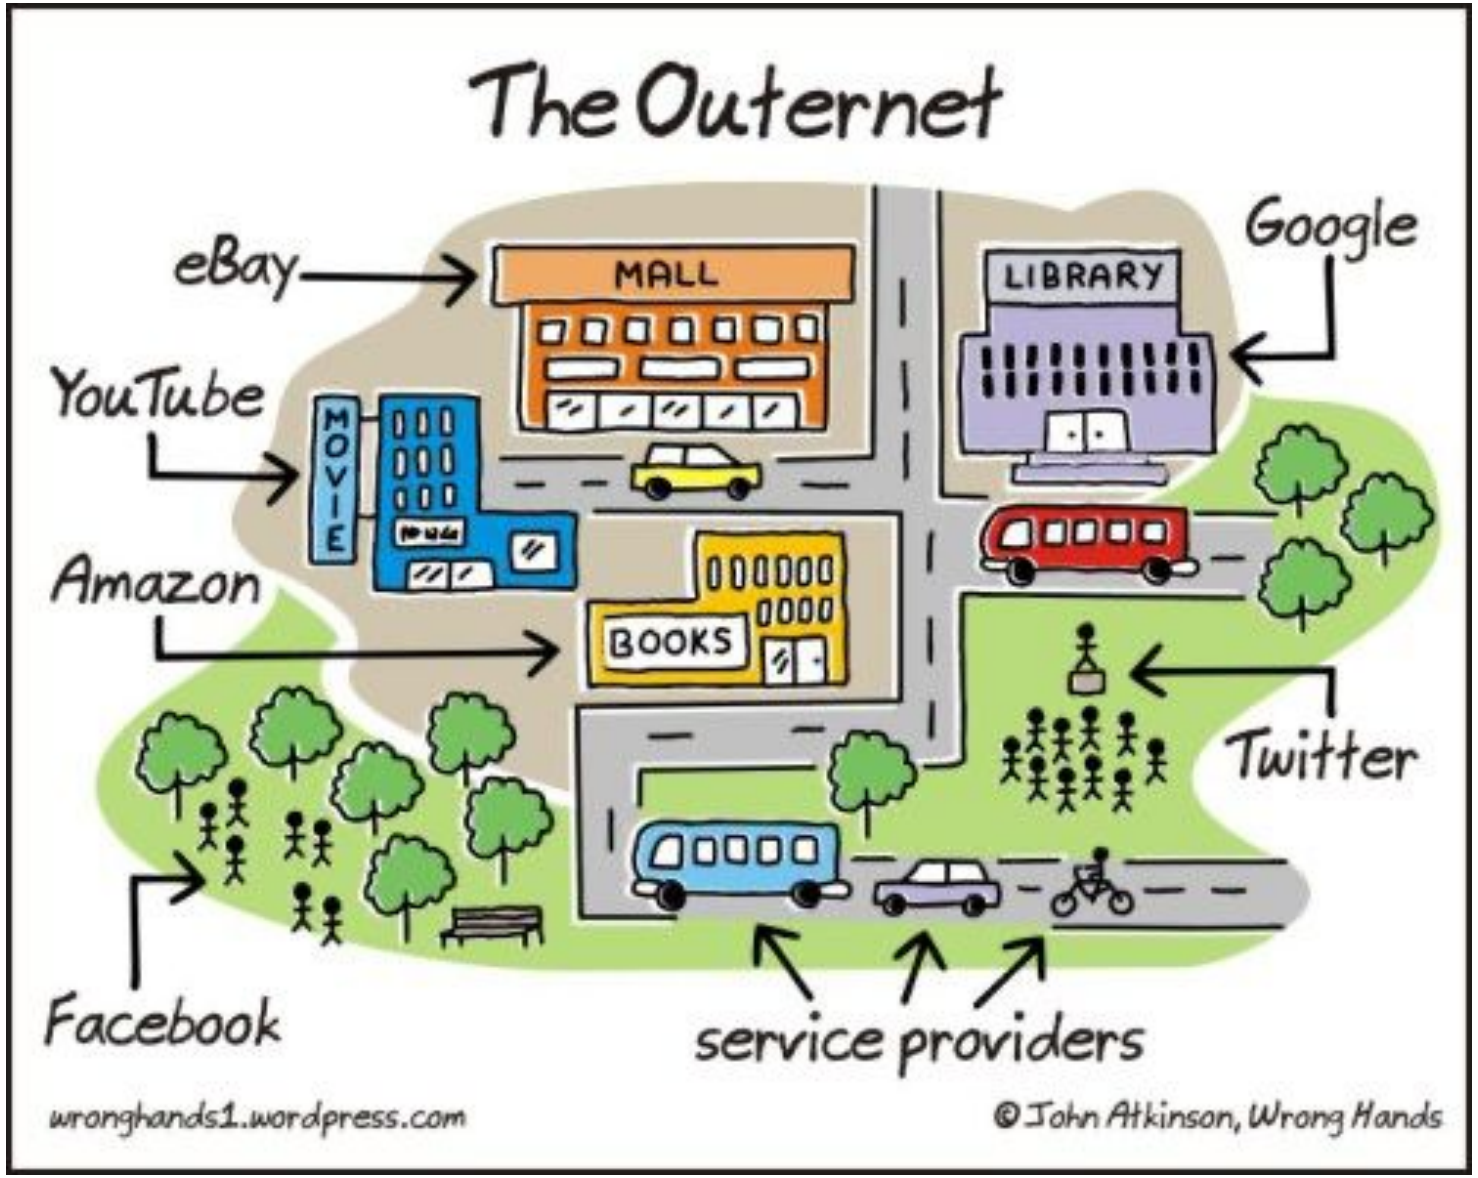
Web

- Web enables people access information time and place independently.
- Help share information in diverse formats (visuals, videos etc).
- It enables people to obtain huge amount of knowledge in a short time duration.
- It enables to follow world-wide events and be part professional communities

If Internet was a Quarter



Web Safety

- Being safe online means individuals are protecting themselves and others from online harms and risks which may jeopardize their personal information, lead to unsafe communications or even effect their mental health and wellbeing.
- Operating within an online space is something most of us simply do subconsciously, but have you ever stopped to consider the potential dangers which exist on the web, especially for our students?
- It encompasses all technological devices which have access to the internet from PCs and laptops to smartphones and tablets.

Possible Risks

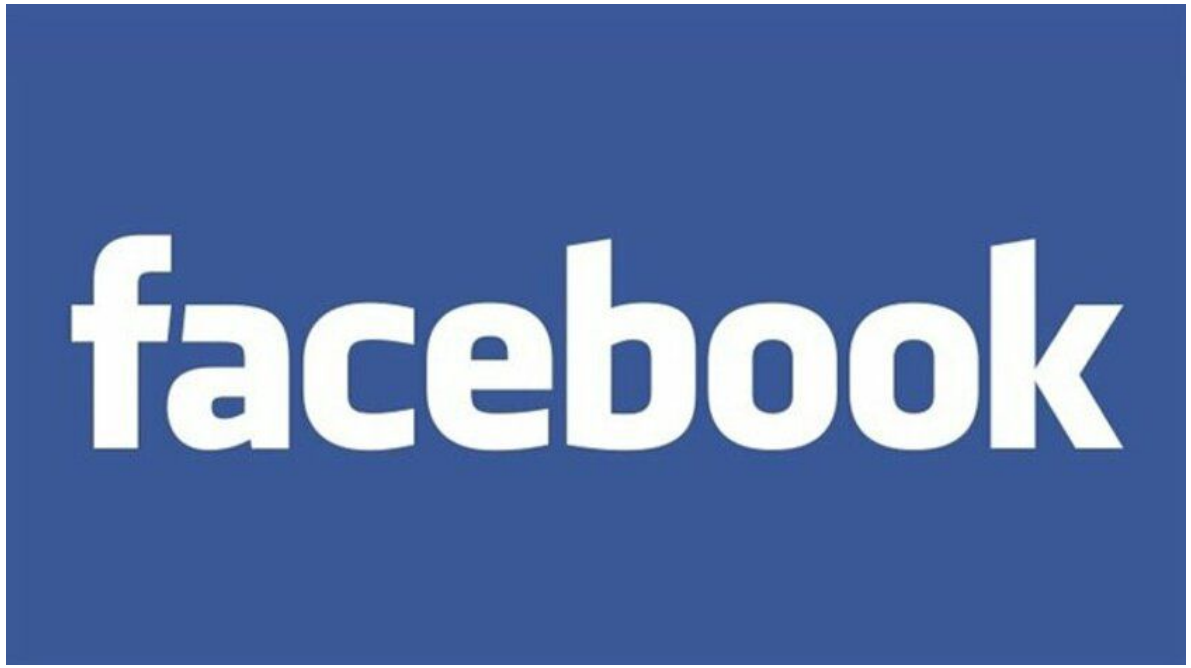
- **Online bullying** is the use of electronic means such as instant messaging, social media, e-mail and other forms of online communication with the intent to abuse, intimidate, or overpower an individual or group.
- **Cyberstalking** is the use of the Internet or other electronic means to stalk or harass an individual, group, or organization.
- Fake news in social media or fake websites.
- Loss of personal data such as our passwords, bank account number etc.

Possible Risks

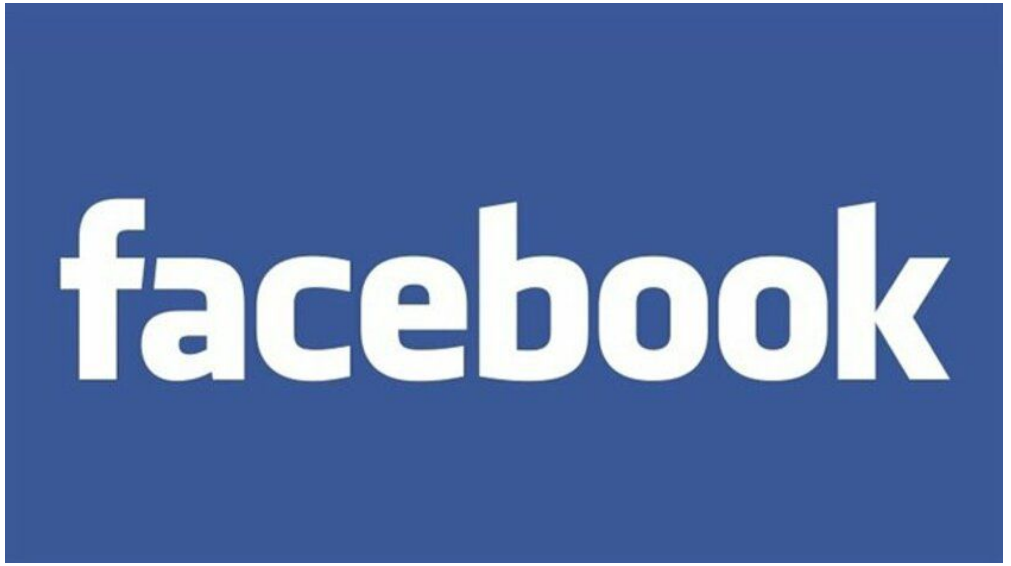
- **Online predation** is the act of engaging an underage minor into inappropriate sexual relationships through the internet. Online predators may attempt to initiate and seduce minors into relationships through the use of chat rooms or internet forums.
- **Obscene/offensive content:** Various websites on the internet contain material that some deem offensive, distasteful or explicit, which may often be not of the user's liking. Such websites may include internet, shock sites, hate speech or otherwise inflammatory content.

- There exists several special applications and programs for keeping the information safe.
- Also, the web tools, browsers or applications have particular options to keep the web experiences safe.
- Be safe, be happy!

Facebook and Youtube



- Facebook is a social network that aims people to communicate and Exchange information with other people.
- Established in 2004, from the college dorm room of Mark Zuckerberg.
- It allows users to share pictures, music, videos, and articles, as well as their own thoughts and opinions with however many people they like.
- Users send “friend requests” to people who they may – or may not – know.
- Facebook has over 1 billion users



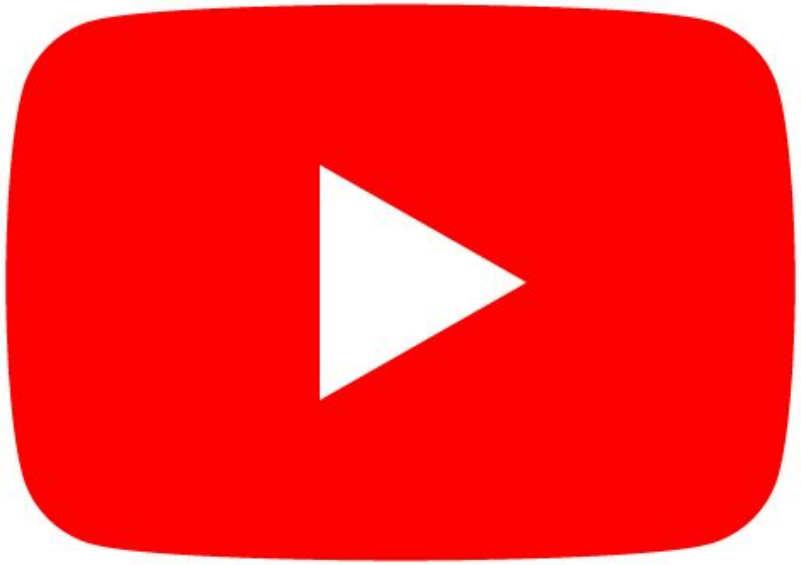
- People can add anyone as «friend».
- Once accepted, the two profiles are connected with both users able to see whatever the other person posts.
- People can post almost anything to their “timeline”, a snapshot of what is happening in their social circle at any given time, and can also enter private chat with other friends who are online.

- People with profiles list information about themselves.
- Whether it be what they work at, where they are studying, ages, or other personal details, many users post lots of information which is easily accessible to their friends and others.
- On top of this, users can “like” other pages which interest them.

- YouTube (Picture 25) is an American video-sharing platform. YouTube allows users to upload, view, rate, favorites, share, add to playlists, flag, report, comment on videos, and subscribe to other users.
- YouTube is a video sharing app bought by Google in 2006, ranked in 2018 as the second most popular.

Why use YouTube?

- One reason YouTube is so popular is the sheer number of videos you can find. On average, 100 hours of video are uploaded to YouTube **every minute**, so there's always something new to watch!
- And you'll find all kinds of videos on YouTube—adorable cats, quirky cooking demos, funny science lessons, quick fashion tips, and a whole lot more.



- As technology improves, there are more ways to help trainees with learning disabilities than ever before.
- You know already that e-Learning videos can be a very powerful learning tool, they add a dynamic element in the classroom, improve knowledge transfer demonstrate complex procedures, and help explain difficult topics.

Youtube

- This is why the video sharing website You Tube can provide unlimited opportunities to improve your work not only using the countless videos you can find there, but also creating your own to help your trainees achieve their learning goals and objectives.

- The only thing you should pay attention to is ensuring that videos you are using are aligned with your expected learning outcomes and are appropriate for your trainees.
